

Microdermabrasion improves wrinkles, skin texture and color by polishing the top most layer of the skin and vacuuming dead skin cells in a safe, controlled manner. Microdermabrasion improves dull or uneven skin color, relieves clogged pores/blackheads, refines the appearance of fine lines and large pores, and softens roughness or thickened patches of dead skin.

Before and After a Series of Treatments

Treatable Conditions: Aging Skin, Fine Lines, Superficial Pigmentation, Blemished Skin, Dull Skin, Devitalized Thickened Skin, Superficial Sun Damaged Skin, Enlarged Pores, Acne Scars, Blackheads
